

Participant FY7

This is participant FY7. So the first thing I just want to ask is kind of how did you feel when you were doing that?

Like in an exam setting

Because I was

Yeah

And how has it been at work today in general since you arrived this morning?

It has been ok

How long have you been here today?

Today?

Yes

Since 7 o'clock

So it is about 3 o'clock now. Ok, so when we were doing that there was one thing I noticed that I noticed was different to what I was expecting to see, and if it is ok I would like to talk about that?

Yes

So you set the rate to give it in the end to 180 mls per hour

Yes

And you knew it was 2 hours to give it over didn't you, umm but that, the rate should have been 55 mls per hour to give it over 2 hours because it is in a, it was in a, it is not there anymore

Oh I this is the volume is 100 ml, whoops I just panicked, yes I put the 360, 360 from the drug chart, yeah, yeah, yeah of course

So you intended to give it over 2 hours

55

And I saw that you used the guide to look up in the table and you got the time right. So why do you think that little mistake happened?

It is just because maybe I don't know, maybe I panicked too much being watched

Yes fair enough, I think I would. Was it anything to do with the guide that made that more likely?

Umm no, I don't know maybe just because I am not used to the setting, to the format of the guide. But yes it was very clear, I just kind of, I didn't look properly

Ok and can you think of any changes we could make to the guide to try and stop that sort of thing from happening?

Umm it is hard to say.... No, no it is just I should have seen it.

That's fine, well thank you very much

Thank you
